To Whom It May Concern:

In pursuit of new opportunities, I was thrilled to find the position in the field of mathematics available within your district. After reviewing edjoin, I believe that I would be a good fit for this position.

Throughout my education and teaching experience, I have implemented and facilitated math curriculum for grades 9 through 12 grades, in all levels. I have adapted the curriculum to accommodate individual students' needs whether that's for those who need extra help or those who are excelling. Additionally I have helped coordinate a tutoring class in which students that excel help those who need extra help. I advocate for all of my students, teaching them life skills in a safe environment. My goal is to connect and create a relationship with all of my students so they feel comfortable to ask questions and learn.

Thank you for your time and consideration, I believe I would be an asset to your staff and math department. I will respectfully submit my resume and application for your review. I will make myself available to speak with you at your convenience.

Sincerely

Nathan Curless
